- 06** Interactivity and compatibility
- 07** Why choose TECHNIA's widget solutions?
- 08** Conclusion

# Introduction

As a user of the 3DEXPERIENCE platform, you may occasionally need additional functionality or specialized views to improve productivity and the user experience. TECHNIA provides powerful tools to efficiently create custom dashboard widgets, helping you get more out of the 3DEXPERIENCE platform without requiring extensive coding or ongoing maintenance.

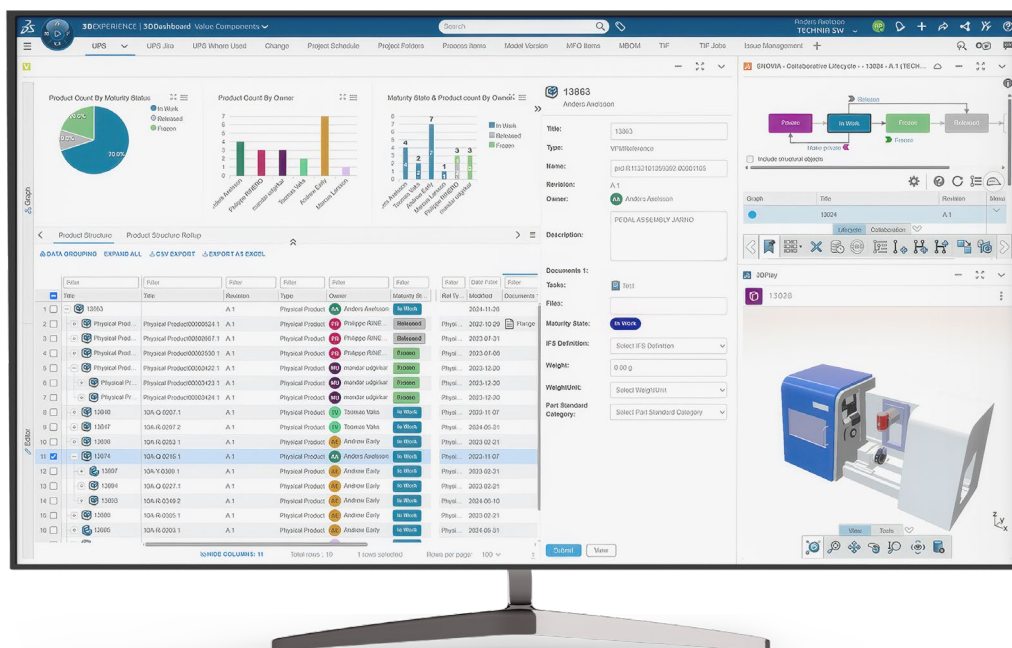

## ENHANCING ON-PREMISE 3DEXPERIENCE WITH TECHNIA

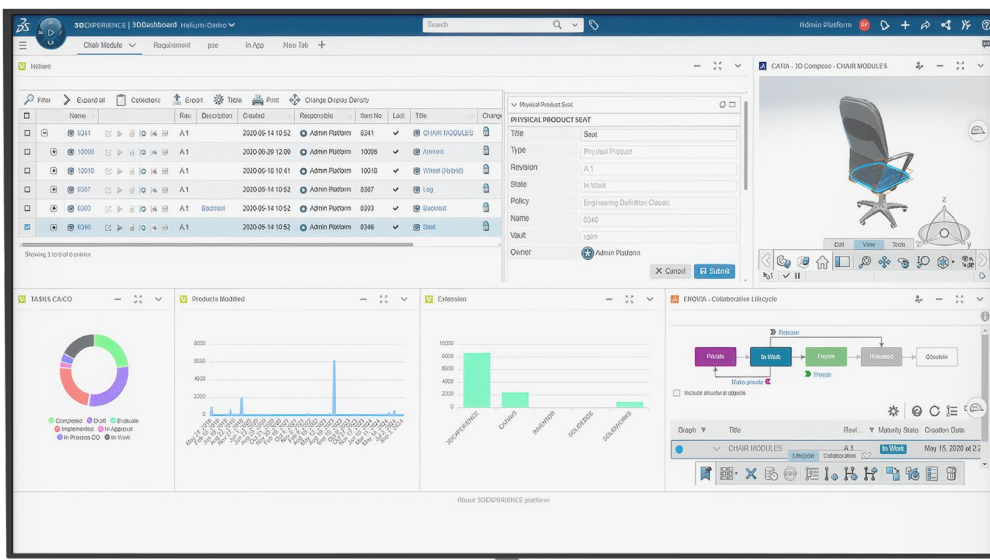

For organizations using 3DEXPERIENCE on-premise, TECHNIA offers solutions that allow you to quickly and easily create rich, interactive dashboard widgets.

These widgets are easier to modify as requirements evolve, minimizing long-term effort and maximizing flexibility. While the setup often involves collaboration with TECHNIA consultants to align with your environment and needs, our solutions significantly extend the platform's functionality with minimal complexity.

This video demonstrates, in real-time, how to set up a dashboard widget using TECHNIA's on-premise solution, highlighting the simplicity and speed of implementation.

# Simplifying cloud deployments with TECHNIA

If you're using the cloud version of 3DEXPERIENCE, TECHNIA delivers a seamless and efficient approach to creating dashboard widgets, without the overhead of managing additional hardware or software infrastructure.

## HERE'S HOW IT WORKS:

### Collaborative Configuration

TECHNIA works closely with your team to understand your specific needs and tailor the widget accordingly.

### Secure Integration

All your data remains entirely within your system. The TECHNIA-hosted widget is purely functional and does not store or access any customer-specific data. This ensures a secure and compliant integration.

### Simple Deployment

Once configuration is complete, a web link is provided for direct integration into your dashboard, enabling instant access to the new functionality with minimal effort.

This video guides you through the cloud widget setup process, showcasing the ease, security, and user-friendliness of TECHNIA's cloud solutions.

# Interactivity and compatibility

TECHNIA's widgets are designed to behave like native, out-of-the-box (OOTB) 3DEXPERIENCE widgets. This ensures they seamlessly integrate into your dashboards and interact smoothly with other widgets and standard applications.

For example, drag-and-drop functionality works naturally between TECHNIA widgets and OOTB apps, providing users with a unified and intuitive experience.

## WHY CHOOSE TECHNIA'S WIDGET SOLUTIONS?

### Enhanced performance

TECHNIA's tools are built with performance in mind. Our on-premise solutions, in particular, deliver fast and responsive widgets thanks to their direct system integration.

### Ease of use

Whether deployed in the cloud or on-premise, our solutions are straightforward to implement, with no extensive coding required.

### Cost effective

Reduce development time and maintenance costs by leveraging TECHNIA's efficient toolset and expert guidance.

### Scalability

Our solutions evolve with your needs, providing robust, scalable functionality tailored to your specific environment.

### Data security

Your business-sensitive data stays where it belongs, within your infrastructure. TECHNIA solutions never access or store customer-specific content.

### Interoperability

TECHNIA widgets integrate and function effortlessly with OOTB apps and other tools, preserving a consistent and efficient workflow across your dashboards.

## Conclusion

TECHNIA's tools fundamentally enhance how you interact with the 3DEXPERIENCE platform, making it easier than ever to build functional, visually appealing dashboard widgets that align with your business needs.

Explore the possibilities by watching our demonstration videos, and experience firsthand how our solutions can elevate your 3DEXPERIENCE environment standards.

ABOUT TECHNIA

# Smarter products faster

Few things are more complex, costly, or time-consuming than bringing new products to market.

In fiercely competitive industries, increased efficiency and transparency are more in demand than ever. That's why we help clients deploy unique solutions that simplify processes, drive product innovation, and shorten time to market.

We're not saying it will always be straightforward. But with the right mix of technology, people, and dedication, we reduce complexity so companies can accelerate and excel.

We're forward-thinking problem solvers, and we love working with ambitious clients. For us, it's about making sure companies overcome barriers on their way to breakthroughs.

It's about bringing smarter products to market faster.
